

Stanislaus County Fair Board of Directors

Dear Exhibitor:

Having a green thumb takes a new meaning at this year's Stanislaus County Fair, where rainforest creatures and recyclers alike are getting into the green scene anticipating the arrival and display of thousands of extraordinary competitive exhibits.

This year we join together to support the preservation of the environment. The 2009 Fair theme, "Renewable Fun," will be cultivated all over the fairgrounds, which will include close to 30,000 individual exhibits.

The exhibit program is the nature of the Stanislaus County Fair and there's a place for everyone to grow their talents and fresh ideas. We encourage you to join in the renewable fun. So peruse this handbook and send in your exhibitor entry form, and remember to recycle this book at the end of the fair.

The 2009 Stanislaus County Fair is the place where fun is always renewable. It's going to be a great year and we invite you to be there!

Sincerely,

Ray Souza
President of the Board of Directors
